РАБОЧИЕ КОЛЕСА ДЛЯ НАСОСОВ

High Chrome Slurry Pump Impeller

The impeller play an extremely important role in the operation of centrifugal slurry pump. By rotating, it can help slurry pump meet the needs of the equipment.

The slurry pump impeller is easy to be worn out, so we search for the special materials to prolong the lifespan of impeller, high chrome white iron is one of them, aims at handling the slurries with strong abrasion or sharp particles.

There are main three type of impeller, Open, Semi-open and Closed. So impeller selection to deal with different slurry with solid have different choices. Our engineer will offer you the best solution for slurry handling.

As a China-based slurry pump impeller manufacturer, we provide a broad range of impellers, including froth pump impeller, medium/light duty pump impeller, sump pump impeller sand pump impeller and FGD(flue gas desulfurization) pump impeller or customized impellers.

For now, we can produce our own pump impellers, and also can do some other slurry pump impellers size and material compactly.

Rubber slurry pump impellers

Slurry pump impeller can play an extremely important role in the operation of slurry pump. By rotating, it can help slurry pump meet the needs of the equipment. The slurry pump impeller is easy to be worn out, so we search for the special materials to prolong the lifespan of impeller.

Rubber slurry pump impellers are used to deal with the corrosive slurry with blunt particles. They are made of natural rubber, synthetic rubber, EPDM Rubber, Nitrile Rubber, Fluoroelastomer or any other as you required.

We proudly manufacture quality rubber slurry pump impellers and other replacement parts for some famous pump manufactures, which are 100% REVERSE INTERCHANGEABLE, no need to change your stock.

We manufacture with the iron, high chrome slurry pump impellers, or customized impellers are required. For now, we can not only produce our own pump impellers, but also can do some other impellers size and material compact with OEM manufactures

Partial list of Impellers available for the contemporary and legacy OEM styles

AH slurry pump impellers style

Ceramic slurry pump impellers

Ceramic slurry pump impellers are made of Silicon Nitride Bonded Silicon Carbide, aimed to Wear and Erosion resistant working application.

We proudly manufacture quality ceramic slurry pump liners and other replacement parts for some famous pump manufactures, which are 100% REVERSE INTERCHANGEABLE, no need to change your stock.

6 / 4 8 / 6

Polyurethane slurry pump impellers

We proudly manufacture quality Polyurethane slurry pump impellers and other replacement parts for some famous pump manufactures, which are 100% REVERSE INTERCHANGEABLE, no need to change your stock.

Polyurethane slurry pump impeller (PUR and PU) is made by Polyurethane which is a polymer composed of a chain of organic units joined by carbamate (urethane) links. This impeller have better performance than nature rubber impeller for the slurry transportation.

Material: Polyurethane(PU, PUR)

Slurry pump expeller

Slurry pump expeller is also a very important slurry pump part. It can not only help seal the pump, but also reduce the centrifugal force. The design and material of expeller is significant to its service life because it is also one of the wet parts.

Cast Iron

High Chrome

Customized material as you required
